

Thozama Gangi

Managing Director/CEO

Ms Thozama Gangi has been with Eskom South Africa for 14 years with most of her career in the Eskom generation business:

- She started with Eskom at Matimba Power Station where she worked in various positions i.e. Boiler Engineering Manager, Plant Performance Manager and Production Manager where she developed Life of Plant Plans and Technical plans for the Power Station. She was instrumental in improving the execution of projects within the approved technical plan where the projects were mainly investment and capital projects.
- Thozama worked as a New Build Integration Manager where she represented the Generation Division of Eskom as a client in the New Build Projects i.e. Medupi and Kusile projects. She was central in ensuring that all permits, licences, environmental assessments (EIA's) etc. are in place for the new build stations.
- Thozama worked at Medupi Power Station as Engineering Manager setting up processes for the Engineering department and building the engineering skills required for operation to ensure a smooth transition from construction to operation.
- She also worked in the Primary Energy Division of Eskom sourcing Coal and Limestone for the coal fired power stations. She introduced initiatives to improve coal quality which is of importance in meeting the power station coal specifications and to improve station plant performance.

Thozama holds Masters (Strategy and Project Leadership) from Sorbonne University, France, an MSC (Engineering Business Management) from University of Warwick, UK and a Bachelor of Science degree in Mathematics and Education from University of Transkei, South Africa.

Thozama is a proud mother of two boys and enjoys making a difference in people's lives by providing opportunities for development which is influenced by her background of also been an educator as part of her career life.
